

Clean Air Prozone generators utilize a proprietary Photohydriozonation process, which targets high intensity uv light on a hydrated quad metallic target in an ozone atmosphere creating hydro-peroxides, ozonide ions, hydroxides and super oxide ions. Clean Air Prozone generators are designed for professional use and produce high-level ozone for non-occupied areas.

### How does the Clean Air Prozone generator work?

Most unpleasant odours are caused by organic compounds containing carbon (C). When these compounds meet the produced oxidisers, they are converted into carbon dioxide (CO<sub>2</sub>) and water (H<sub>2</sub>O). All smells disappear permanently and do not return. Any remaining ozone soon converts back to oxygen.

Clean Air Prozone generators are designed for professionals to use in destroying – not covering up – unpleasant smells caused, for example, by fire and smoke, paints, sewage, cooking, volatile organic compounds, rotting food, pets, fungi, bacteria, viruses, urine, vomit, ammonia, thinner, garlic, tobacco smoke, human remains etc.

### Clean Air Prozone generators are ideal for:

Specialist cleaning companies • Fire- and water damage restoration companies • Food industry • Storage companies  
 • Transport companies • Cold storage facilities • Storage of cheese and fruit • Housing companies • Building management  
 • Waste containers • Rental companies • Carpet cleaners • Car cleaning and detailing companies • Car hire companies  
 • Water damage repair companies • Ozone rooms (for dry cleaners, fire restoration, mattress cleaning)

### Characteristics:

- Permanently removes smells • Simple to use • No use of chemicals • Leaves no chemical residue
- Kills airborne bacteria, mould, mildew and viruses • No side effects

Technical specifications	Clean Air Pro 20SS	Clean Air Pro 10SS	Clean Air Mobil Pro
Ozone concentration*	13,5ppm	13,5ppm	8 ppm
Ozone volume	9090 mg/hour	1870 mg/hour	580 mg/hour
Method of production**	UV target on a "Quad Metallic"coating	idem	idem
Ultraviolet Chamber**	Electrically Excited Krypton Gas	idem	idem
Cells	2x36"HOA	2x14"HOA	1x11"HOA
Ventilator	111 m3/hour	76m3/hour	
Voltage	230 volt	230 Volt	12/230volt
Amps	2	1,25	0,5
Controls	on/off/timer/hour meter	on/off/timer/hour meter	on/off
Dimensions hxdxw	33x31x109 cm	33x31x66 cm	10x10x45 cm
Weight	14 kg	8kg	2 kg
Material	Stainless steel	Stainless steel	Stainless steel

\*at the outlet with a relative atmospheric humidity of 40% \*\*patented \*\*\*supplier reserves the right to technical modifications without further notice
