Clean Air - the natural odour eliminator

Clean Air Ozone generator type Mobil pro

- **Definite elimination of unwanted odours**
- **Works easy and fast**
- **Without the use of chemicals**
- **No side effects**
- **No return of odours, guaranteed!**

How does the Clean Air ozone generator work?

After a thunderstorm it smells clean and fresh outside. The freshness comes from the ozone that is created during lightning. Ozone is an unstable gas that reacts with organic compounds and changes the smelling carbon into innocent carbon dioxide. Due to the irreversible process the smell never returns.

Which odours can be eliminated by the Clean Air Mobile Pro?

The Mobile Pro can be used in case of temporary or often returning odour problems. **The Mobile Pro** can only be used in spaces which are temporarily not in use. For rooms in use we advise the Clean Air PHI system.

The Mobile Pro is mostly being used by professionals.

Some examples:

- Rental companies for mobile homes, boats, caravans
- Hotel and recreational companies for quick elimination of odours or smoke in rooms or any other space.
- Car dealers
- Polishing companies
- Cabs
- Car rental companies
- Transportation and container companies; to prevent that an odour effects another product during a ride.

Clean Air eliminates the following odours:

- cigarette / cigar - dog - urine - vomit - body - sewer - fish - decay - garbage containers

Ideal for prevention of moulds and bacteria after water- or moisture damage, removes 90% of the moulds and bacteria in the air within 24 hours.

Eliminates:

- cigarette smoke
- animal odours
- cooking- and food odours
- fire odours in rooms and clothing
- stale odours in boats and mobile homes

Advantages:

- no chemicals necessary
- no maintenance
- 12 and 220 volt connection
- lightweight
- made of Stainless steel

SPECIFICATIONS

Dimensions:	10x10x45 cm
Electrical:	12 V Amp Of 230 Amp
Weight:	2 kg
Ozon output:	4,5 ppm - 45 m ³ /h
Controls:	by time switch
System:	High advanced oxidation ozonide ions, hydro- peroxides, hydroxides and super oxide ion output

subject to alterations
