

Clean Air

Clean Air AOP Midi - Professional
AOP Air Purification System

Clean indoor air gives you a competitive edge.

Better indoor air – better productivity

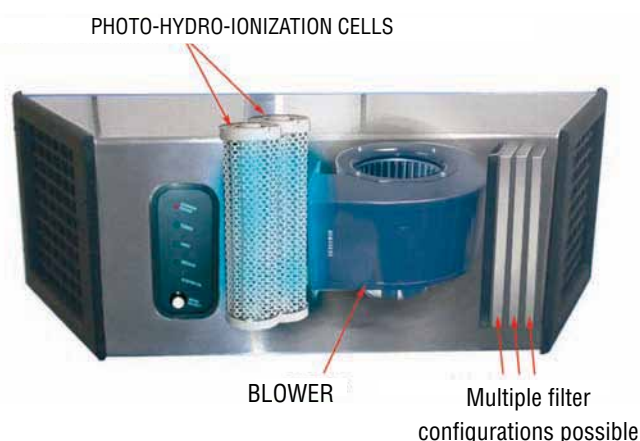

Indoor air pollution is considered to be the no. 1 environmental health problem. Tightly sealed buildings and homes may be more energy efficient but can trap pollutants and microbes indoors causing odours, mould, allergies, and illness.

The Clean Air AOP technology has proven to drastically reduce airborne odours, mould, bacteria, and viruses (in the 90+ percentile).

Effective and easy to use – from offices to warehouses

Clean Air Midi is perfect for occupied rooms up to 400 m³: Offices, entrances, locker rooms, restaurants, production areas in the food industry, and warehouses.

- For more information on how the AOP system works, see our AOP leaflet.
- See also our Bacteria Reader to find out how the AOP system reduces airborne smoke, mildew/mold, odours, bacteria, viruses and VOC's.

Clean Air Midi units are easily mountable on walls.

Technical specifications	Clean Air Midi 9 + 5	Clean Air Midi 9 + 9
Method of production	AOP	AOP
Cells	1x5"A and 1x9"A with a catalyst	2x9"A with a catalyst
Ventilator	420 m ³ /hour	420 m ³ /hour
Voltage	230 Volt	230 Volt
Amps	5	5
Controls	on/off/turbo/medium/low & filter control	on/off/turbo/medium/low & filter control
Dimensions HxDxW	33x32x124 cm	33x32x124 cm
Weight	24 kg	24 kg
Material	Stainless steel	Stainless steel
Filter	Multiple filter configurations possible	Multiple filter configurations possible
Capacity *	300-600 m ³	300-600 m ³

* depends on the organic load

Absorber cartridges:

1. Multi cartridge
odours and particulate
2. Ultra cartridge
Particulates – low level elimination
3. Mercury cartridge
Removal mercury vapors
4. VOC cartridge
Smoke, VOC's, chemicals
5. Radon cartridge
Removal radioactive radon gas
6. FOG cartridge
Fats, oils, grease
